about Kilpi

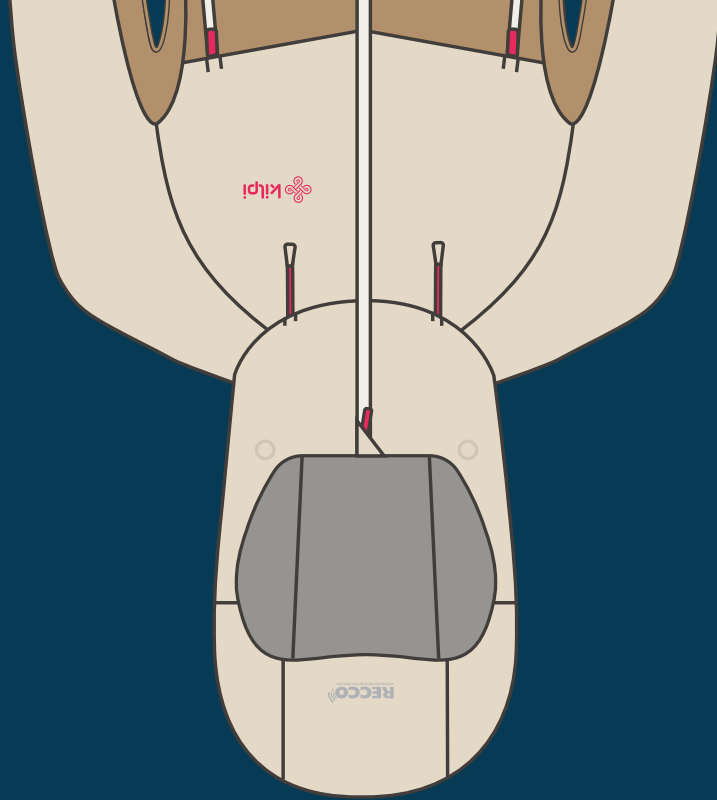

We have risen to the challenge of the NORTH and created a Kilpi brand of outdoor clothing and accessories. They have been tested by the unrestrained north, by its pride and dignity as well as uncompromising demands and claims of the mythical heroes' country. If you really want to experience the real winter, you have to be prepared. Kilpi means „shield“ in Finnish. Therein the nature and houses have built up their defence, you need it as well. You can rely on Kilpi clothes and accessories. They will protect you and make you feel safe and secure.

Increasing the quality of the Kilpi sportswear and constant technological progress are our priority. To keep two steps ahead of the competition, we selected extreme sportsmen to the Kilpi Racing Team. They are involved in the innovations of our functional outfit and thoroughly test each product so we can offer our customers only outfits that have undergone rigorous testing. They also come with new improvements and useful suggestions that make the Kilpi clothing highly valued among professional and amateur athletes.

In KILPI range you can find an entire outfit both for winter and summer, accessories and even some trifles. You are going to be dressed up for a trip to the country as well as to the city, for sport activities and even for relaxation moments. We will outfit you with purpose-built and design jackets, perfect fit trousers, functional underwear and even stylish and trendy T-shirts. When the burning summer takes it's turn over a severe winter you can go swimming in our swimwear or take other summer items.

Outdoor clothing has to be functional and reliable first of all. The processing quality, sophisticated, well-developed, details and the choice of the most appropriate technologies form the basis of the high-quality outdoor clothing Kilpi. We created up-to-date and advanced Siberium® material, which has undergone more than 10-year development. Siberium® makes use of the principle of fibreglass laminating, it is very firm, stable, permeable and elastic. Owing to these features, characteristics our winter and softshell jackets are able to replace and compensate for a few layers of clothes.

MATERIALS

Dermizax.

Top material from Japanese brand TORAY, which offers high water resistance and breathability thanks to a clever non-porous membrane. Dermizax products are highly durable, long-lasting and easy to maintain, and are suitable for alpine hiking, ski mountaineering or other outdoor activities.

Špičkový materiál z dílny japonské značky TORAY, který nabízí vysokou voděodolnost a prodyšnost díky chytré neporézní membráně. Produkty z materiálu Dermizax jsou vysoce odolné, mají dlouhou životnost a lehce se udržují a jsou vhodné pro vysokohorskou turistiku, skialpinismus nebo jiné outdoorové aktivity.

SiBER!UM 30.000 2,5L

Products made of this two-layer laminate with an additional impregnation, provides a water column of up to 20.000 mm / m² / 24h and extremely high breathability of up to 30.000 g / m² / 24h. Clothing made of this material is extremely lightweight, compact, ideal for intensive sports such as running, hiking in bad weather conditions.

Produkty vyrobeny z této dvouvrstvé laminace s dodatečnou impregnační vrstvou vynikají vodním sloupcem až do 20.000 mm/m²/24h a extrémně vysokou prodyšností až do 30.000 g/m²/24h. Oblečení z tohoto materiálu je extrémně lehké, kompaktní, ideální pro intenzivní sporty jako běh, turistika v nepříznivém počasí.

SiBER!UM 20.000 2L STRETCH

Products made of this membrane material are designed especially for high-quality ski clothing suitable in bad weather conditions. The SiBER!UM two-layer lamination is highly elastic, offers a water column of 20.000 mm / m² / 24h and a breathability of 10.000 g / m² / 24h, in addition it is sufficiently strong and durable. The inner elastic lining maximizes comfort and freedom of movement.

Produkty vyrobeny z tohoto membránového materiálu jsou určeny zejména pro lyžařské oděvy vysoké kvality a do nepříznivého počasí. Dvouvrstvá laminace SiBER!UM je vysoce elastická, nabízí vodní sloupec 20.000 mm/m²/24h a prodyšnost 10.000 g/m²/24h, navíc je dostatečně pevná, odolná. Vnitřní elastická podšívka maximalizuje pohodlí a volnost pohybu.

SiBER!UM 10.000 2L STRETCH

Products made of this membrane material are designed especially for ski and outdoor clothing of higher quality. The SiBER!UM two-layer lamination is very elastic, offers a water column of 10.000 mm / m² / 24h and a breathability of 8.000 g / m² / 24h, in addition it is sufficiently strong and durable. The inner elastic lining maximizes comfort and freedom of movement.

Produkty vyrobeny z tohoto membránového materiálu jsou určeny zejména pro lyžařské a outdoorové oděvy vyšší kvality. Dvouvrstvá laminace SiBER!UM je velmi elastická, nabízí vodní sloupec 10.000 mm/m²/24h a prodyšnost 8.000 g/m²/24h, navíc je dostatečně pevná, odolná. Vnitřní elastická podšívka maximalizuje pohodlí a volnost pohybu.

SiBER!UM 10.000 2L

Products made of this membrane material are designed especially for outdoor or leisure clothing, for undemanding tourism or wear in the city. The SiBER!UM double-layer lamination offers a water column of 10.000 mm / m² / 24h and a breathability of 8.000 g / m² / 24h, in addition it is sufficiently strong and durable.

Produkty vyrobeny z tohoto membránového materiálu jsou určeny zejména pro outdoorové nebo volnočasové oděvy, na nenáročnou turistiku nebo do města. Dvouvrstvá laminace SiBER!UM je nabízí vodní sloupec 10.000 mm/m²/24h a prodyšnost 8.000 g/m²/24h, navíc je dostatečně pevná, odolná.

SiBER!UM 10.000 3L

Products in this category are designed mainly as protection against bad weather, cold, wind, precipitation. The two-layer lamination with a water column of 10.000 mm / m² / 24h and a breathability of 10.000 g / m² / 24h is very light, compact and durable. Clothing from this category is ideal for alpine hiking, ski mountaineering or outdoor activities.

Produkty v této kategorii jsou určeny zejména jako ochrana před nepříznivým počasím, před chladem, větrem, srážkami. Třívrstvá laminace s vodním sloupcem 10.000 mm/m²/24h a prodyšností 10.000 g/m²/24h je velice lehká, kompaktní a odolná. Oblečení z této kategorie je ideální na vysokohorskou turistiku, skialpinismus nebo outdoorové aktivity.

SiBER!UM 5.000 CT

Products from this category are especially suitable for skiing, hiking and outdoor, the material is very lightweight, durable and has a long life. Water column value 5.000 mm / m² / 24h and breathability 5.000 g / m² / 24h. These clothes are suitable for undemanding sport activity in cold weather.

Produkty z této kategorie jsou vhodné zejména pro lyžování, turistiku a outdoor, materiál je velice lehký, odolný a má dlouhou životnost. Hodnota vodního sloupce 5.000 mm/m²/24h a prodyšnost 5.000 g/m²/24h. Toto oblečení se hodí pro nenáročnou fyzickou aktivitu v chladném počasí.

SiBER!UM 10.000 SRC SS

Thanks to the inner membrane, the softshell material made of a three-layer construction reliably protects against cold and wind from the outside, and the inner fleece layer maintains a feeling of dryness and warmth. Products from this category with a water column of 10.000 mm / m² / 24h and a breathability of 8.000 g / m² / 24h are suitable for leisure and outdoor activities with a lower intensity in cold weather.

Softshellový materiál z třívrstvé konstrukce díky vnitřní membráně spolehlivě chrání před chladem a větrem zvenčí a vnitřní fleecová vrstva udržuje pocit sucha a tepla. Produkty z této kategorie s vodním sloupcem 10.000 mm/m²/24h a prodyšností 8.000 g/m²/24h jsou vhodné pro volnočasové a outdoorové aktivity s nižší intenzitou zátěže v chladném počasí.

SiBER!UM SRC WB

Thanks to the inner membrane, the softshell material made of a three-layer construction reliably protects against the cold and the wind from the outside, and the inner functional layer maintains a feeling of dryness and warmth. The elasticity of the material enhances the feeling of comfort and freedom of movement. Products from this category are mainly characterized by wind resistance, they are suitable for sports and outdoor activities with a higher intensity in cold weather such as running, cross-country skiing or hiking.

Softshellový materiál z třívrstvé konstrukce díky vnitřní membráně spolehlivě chrání před chladem a větrem zvenčí a vnitřní funkční vrstva udržuje pocit sucha a tepla. Elastická látka umocňuje pocit pohodlí a volnosti pohybu. Produkty z této kategorie se vyznačují hlavně odolností vůči větru, jsou vhodné pro sportovní a outdoorové aktivity s vyšší intenzitou zátěže v chladném počasí jako běh, běžky nebo turistika.

SiBER!UM DWR WB

Products in this category are treated with a layer of impregnation, which increases the wind resistance and water repellency of the fabric. In combination with a warm synthetic or feather filling, this clothing is designed to protect against the cold and the wind. They are very soft, light and compact.

Produkty v této kategorii jsou ošetřeny vrstvou impregnace, která zvyšuje větruodolnost a voděodpudivost látky. V kombinaci s hřejivou syntetickou výplní nebo výplní z peří je toto oblečení určeno pro ochranu před chladem a větrem. Jsou velice měkké, lehké a kompaktní.

TORAY

Toray represents a group of high-quality materials from a renowned brand that we use in crafting our premium sportswear. Thanks to advanced technologies and meticulous manufacturing processes, these materials offer excellent properties such as water resistance, lightness, anti-static treatment, and high durability. Each Toray material is designed with comfort, performance, and longevity in mind, providing maximum support for athletic activities. Additionally, Toray embraces an eco-friendly approach and a commitment to environmental responsibility. The production meets strict international standards of sustainability and natural resource conservation, ensuring our sportswear not only performs exceptionally but also respects the environment.

Toray představuje skupinu vysoce kvalitních materiálů od renomované značky, které používáme k výrobě našeho špičkového sportovního oblečení. Díky pokročilým technologiím a pečlivým výrobním procesům nabízí tyto materiály skvělé vlastnosti, jako je voděodolnost, lehkost, antistatická úprava a vysoká odolnost. Každý materiál Toray je navržen s ohledem na pohodlí, výkon a dlouhou životnost, aby poskytoval maximální podporu při sportovních aktivitách. Toray navíc přináší ekologický přístup a odpovědnost vůči přírodě. Výroba splňuje přísné mezinárodní standardy udržitelnosti a ochrany přírodních zdrojů, takže naše sportovní oblečení nejen skvěle funguje, ale také respektuje životní prostředí.

DOWN

So far, the best insulating material for clothing are goose or duck feathers. Compared to any synthetic material, feathers are lighter, more compact and have better insulating properties. What really insulates the feather layer, is the air, its flow is directed by the feathers. Our clothing uses a ratio of down and feathers of 90/10, which guarantees the highest thermal insulation, lightness and easy packability. With proper care and storage, feather clothing has a long life and reliable functionality.

Pro oblečení je doposud nejlepším izolačním materiálem husí nebo kachní peří. Oproti jakémukoli syntetickému materiálu je peří lehčí, kompaktnější a má lepší izolační vlastnosti. To, co v pérové vrstvě izoluje, je vzduch a peří pouze velmi účinným způsobem brání jeho proudění. V našem oblečení je použit poměr prachového chmýří a peří 90/10, což zaručuje nejvyšší tepelnou izolaci, lehkost a snadnou sbalitelnost. Při správném ošetřování a skladování má pérové oblečení dlouhou životnost a spolehlivou funkčnost.

OPTI-HEAT

These unique knits help maintain warmth and at the same time effectively protect the body from the penetration of cold from the outside environment. Middle layers, sweatshirts and sweaters are suitable for all outdoor and leisure activities in cold weather.

Tyto unikátní pleteniny napomáhají udržovat vlastní teplo a zároveň účinně chrání tělo před pronikáním chladu z vnějšího prostředí. Střední vrstvy, mikiny a svetry jsou vhodné pro veškeré outdoorové a volnočasové aktivity v chladném počasí.

OPTI-STRETCH PERFORMANCE

The specificity of products made of OPTI-STRETCH material is the 4-way elasticity, which in combination with an elaborate cut and functional details offers mainly the comfort of movement. The knitting structure helps lead away the moisture and prevents the penetration of cold from the outside. You will appreciate these products especially during demanding sports, outdoor activities or in your free time.

Specifikem produktů z materiálu OPTI-STRETCH je 4 směrná elasticita, která v kombinaci zpracovaným střihem a funkčními detaily nabízí hlavně komfort pohybu. Struktura pletení pomáhá odvádět vlhkost a brání pronikání chladu zevnitř. Tyto produkty oceníte hlavně při náročných sportovních, outdoorových aktivitách nebo ve volném čase.

OPTI-DRY

Materials specific for their high elasticity, breathability and ability to quickly remove moisture and sweat. Ideal as a base layer for all sports or outdoor activities, it will keep you warm, dry and comfortable.

Materiály specifické svou vysokou elasticitou, prodyšností a schopností rychle odvádět vlhkost a pot. Ideální jako základní vrstva pro veškeré sportovní nebo outdoorové aktivity, udrží vás v teple, suchu a komfortu.

PRIMALOFT Classic®

PrimaLoft® Classic are one of our more classic and most popular insulation materials used especially for ski jackets and pants. The percentage of recycle in the filler varies from level to level - Black, Silver or Gold, but at least 80% is made from recycled felt waste. The main advantage and difference of PrimaLoft® fillings, is their ability to resist moisture and their lightness, fluffiness and pack-ability, comparable to down filler.

PrimaLoft® Classic jsou nejklasičtější a jedny z našich nejoblíbenějších izolací, používaných zejména pro lyžařské bundy a kalhoty. V jednotlivých levelech - Black, Silver nebo Gold se liší podíl recyklatu ve výplni. Nejméně však 80% je vyrobeno z recyklovaných plastových odpadů. Hlavní výhodou a rozdílem výplní PrimaLoft® je její schopnost odolávat vlhkosti, lehkost, nadýchanost a sbalitelnost, porovnatelná s pérovou výplní.

PRIMALOFT ThermoPlume®

ThermoPlume® is a synthetic filler representing a vegan alternative to down fillers. It is designed to simulate the properties and benefits of down - such as its lightness, insulating ability, fluffiness, softness and compressibility. As an added bonus, it is made from 100% recycled materials and features fluorocarbon-free waterproofing. We use PRIMALOFT® ThermoPlume® filler for example in our running or skialp jackets to achieve the required functionality for this type of intense sporting activity.

ThermoPlume® je syntetická výplň představující veganskou alternativu k péroovým výplním. Je navržena tak, aby simulovala vlastnosti a přednosti peří jako jeho lehkost, schopnost izolovat, nadýchanost, měkkost a stlačitelnost. Jako bonus, je vyrobena ze 100% recyklovaného obsahu a vyznačuje se voděodolností bez obsahu fluorovaných uhlovodíků. Výplň PRIMALOFT® ThermoPlume® používáme například v našich běžeckých nebo skialpových bundách, abychom docílili požadované funkčnosti pro tento typ intenzivních sportovních aktivit.

PRIMALOFT DownBlend®

The PrimaLoft® Down Blend is a unique hybrid of water-repellent down and ultra-fine PrimaLoft® fibres. The PrimaLoft® Down Blend combines the lightweight warmth and pack-ability of down, with the wet-weather durability of PrimaLoft. The synthetic component in all PrimaLoft® Down Blend blends now incorporates PrimaLoft® Bio™ technology - 100% recycled synthetic fibres for insulation and the fabric - making PrimaLoft® Down Blend fully biodegradable. In addition, products with this filler, dry 4 times faster, compared to standard down fillers. Our products use blends containing a 60:40 ratio of down duck feathers to synthetic fibres, or a blend of 70% goose down to 30% synthetic fibres.

PrimaLoft® Down Blend je jedinečným hybridem voděodpudivého peří a ultrajemných vláken PrimaLoft®. PrimaLoft® Down Blend kombinuje lehkou hřejivost a sbalitelnost prachového peří s odolností PrimaLoft vůči vlhkému počasí. Nyní, syntetická složka ve všech směsích PrimaLoft® Down Blend obsahuje technologii PrimaLoft® Bio™, 100% recyklovaná syntetická vlákna pro izolaci a tkaninu - díky čemuž jsou směsi PrimaLoft® Down Blend plně biologicky odbouratelné. Navíc produkty s touto výplní mají schopnost 4x rychleji schnout, v porovnání se standardní pérovou výplní. V našich produktech používáme směsi obsahující poměr prachového kachního peří k syntetickým vláknům 60:40, nebo směs 70% husího peří k 30% syntetického vlákna.

PRIMALOFT Active®

PrimaLoft® Active synthetic fillers have been developed to keep you comfortable during a wide range of activities, regardless of intensity or time of year. They provide breathability, wick moisture well, and are stretchable while retaining their moisture resistance. Other benefits include fluffiness, lightness and pack-ability. The percentage of recycled components is at least 75%.

Syntetické výplně PrimaLoft® Active byly vyvinuty tak, aby vám zajistili pohodlí při široké škále aktivit, bez ohledu na intenzitu nebo roční období. Poskytují prodyšnost, výborně odvádí vlhkost, jsou pružné, ale přitom si zachovávají svou odolnost vůči vlhkosti. Dalšími výhodami jsou nadýchanost, lehkost a sbalitelnost. Podíl recyklované složky tvoří minimálně 75%.

RECCO® passive rescue system works on the principle of two-part technology. Ski resorts and rescue teams have RECCO® detectors, which send directional search signals that bounce off RECCO® spotlights located inside ski jackets, pants, backpacks or your equipment, and can help locate lost people in the field.

RECCO® Pasivní záchranný systém funguje na principu dvoudílné technologie. Lyžařské areály a záchranné týmy mají RECCO® detektory, ty vysílají směrové hledací signály, které se odráží od RECCO® reflektorů umístěných uvnitř lyžařských bund, kalhot, batohů nebo vašeho vybavení a tím můžou pomoci k lokalizaci ztracených osob v terénu.

Thanks to many years of experience, the YKK company has gained the status of the highest quality zippers for clothing, backpacks and other products. Thanks to the high-quality workmanship, they are designed for top jackets, trousers and other products and will ensure you comfortable use of your clothing and its longevity.

Firma YKK díky dlouholetým zkušenostem získala status nej kvalitnějších zipů pro oděvy, batohy a jiné produkty. Díky kvalitnímu zpracování jsou určeny do špičkových bund, kalhot a jiných produktů a zajistí vám komfortní užívání vašeho oblečení a jeho dlouhou životnost.

PFC free materials are fabrics with special durable water treatment coating. But this coating doesn't contain PFC chemicals (per- and polyfluorinated chemicals). So it means those materials are not so harmful to the environment and human body.

PFC FREE materiály jsou látky ošetřené speciálním voděodpudivým zátěrem, který neobsahuje žádné závadné chemikálie z řady PFC neboli per a polyfluorované sloučeniny. Jsou tudíž šetrné k životnímu prostředí a lidskému zdraví.

The Alpaca fiber is one of worthy natural fiber thanks by warm ability. Alpaca fleece is 30% warmer than the merino wool. In general alpaca fleece is stronger, lighter and more resilient than wool. Fiber is hypoallergenic, meaning it does not irritate your skin. It is naturally water resistant, flame resistant. This renewable fiber is natural and biodegradable.

Vlna Alpaka je jeden z nejcenějších přírodních vláken na světě díky své schopnosti hřát. Flís z vlny Alpaka je o 30% vyhřevnější než merino vlna. Flís z Alpaky je silnější, lehčí a rezistentnější než vlna. Tak jako ostatní vlny je antialergické, tzn. nedráždí na dotyk. Je přirozeně vodě odolná a ohně odolná. A samozřejmě svou přírodní povahou je obnovitelná a samorozložitelná.

Manufacturer and brand of the most widely used rubber compound for the production of soles for various types of footwear. Provides superior comfort when walking in difficult terrains, outstanding mechanical resistance and reliability, and shock absorption due to the unique construction. In addition, VIBRAM soles offer a sophisticated system of studs and contours to prevent the shoe from slipping.

Výrobce a značka nejpoužívanější pryžové směsy pro výrobu podešví různých typů obuvi. Poskytuje vysoký komfort při chůzi v náročných terénech, nadstandartní mechanickou odolnost a spolehlivost, pohlcování nárazů díky jedinečné konstrukci. Navíc podrážky značky VIBRAM nabízí propracovaný systém výstupků a tvarů zabráňující sklouznutí boty.

NexTex

A water repellent and breathable membrane insert used in Kílpí gloves to keep your hands dry and comfortable.

Voděodpudivá a prodyšná membránová vsadka používaná v rukavicích Kílpí, díky které zůstanou vaše ruce v suchu a komfortu.

Thinsulate is a brand of synthetic fibers used as insulation. It is a combination of the words thin and insulate (or thin and insulation), which represents the basic properties of this material. Thinsulate™ insulation is used in your jackets, shoes, gloves and hats to help keep you warm when it is cold outside. Thinsulate insulation works on the principle of trapping air molecules between you and the outdoor environment. The more air it captures, the better it insulates. Because the microfibers in Thinsulate insulation are much finer than other fibers, they trap more air in a smaller space and naturally provide better insulation.

Thinsulate je značka syntetických vláken používaných jako izolace. Jedná se o spojení slov thin a insulate (neboli tenký a izolace), což představuje základní vlastnosti tohoto materiálu. Thinsulate™ izolace je použita ve vašich bundách, botách, rukavicích i čepicích, která Vás pomáhá udržovat v teple, když je venku zima. Thinsulate insulation pracuje na principu zachycování molekul vzduchu mezi vámi a venkovním prostředím. Čím více vzduchu zachytí, tím lépe izoluje. Protože mikroválka v Thinsulate insulation jsou mnohem jemnější než jiná vlákna, zachytí více vzduchu na menším prostoru a tím je přirozeně zajištěna lepší izolace.

Polypropylene with silver ions is characterized by excellent wear resistance and also perfect thermal insulation. Socks with the silver ions keep your feet dry and warm and they naturally eliminate odors and are very pleasant to the skin.

Polypropylen s ionty stříbra se vyznačuje skvělou odolností proti opotřebení a také perfektní tepelnou izolací. Ponožky s ionty stříbra udrží Vaše nohy v suchu a teple, přirozeně eliminují zápachy a jsou velmi příjemné k pokožce.

Merino wool comes from the sheep living in the cold regions of New Zealand. Clothes made of this material are very pleasant to touch and pleasant to skin. Merino wool helps neutralize sweat, which naturally eliminates odors, is resistant to dirt and has self-cleaning properties. The fibers are able to absorb large amounts of moisture while still retaining their properties. Merino wool knitwear is ideal for thermal underwear, underwear, socks or other products that are in direct contact with the skin.

Merino vlna pochází z ovců žijících v chladných oblastech Nového Zélandu. Oděvy vyrobené z tohoto materiálu jsou velmi příjemné na dotek a příjemné k pokožce. Merino vlna pomáhá neutralizovat pot čímž přirozeně eliminuje zápach, je odolná vůči nečistotám a má samočisticí vlastnosti. Vlákna jsou schopna absorbovat velké množství vlhkosti, přičemž si pořád zachovávají své vlastnosti. Úplet z vlny merino je ideální na termoprádlo, spodní prádlo, ponožky nebo jiné produkty, které jsou v přímém kontaktu s pokožkou.

Natural cotton is a very popular material, soft to skin and in combination with synthetic fibers excels in elasticity, durability and longevity. These products are very comfortable for leisure and undemanding sports activity.

Přírodní bavlna je velmi oblíbený materiál, hebký k pokožce v kombinaci se syntetickými vlákny vyniká elasticitou, odolností a dlouhou životností. Tyto produkty jsou velice pohodlné pro volný čas a nenáročnou sportovní aktivitu.

Acrylic fiber with its mechanical properties resembles natural wool, it is used for knitted products such as hats, headbands, scarves. It is light, does not crease, has a long lifespan and is pleasant to the skin.

Akrylové vlákno se svými mechanickými vlastnostmi podobá přírodní vlně, používá se na pletací přize a pletené výrobky jako čepice, čelenky, šály. Je lehké, nemačká se, má dlouhou životnost a je příjemné k pokožce.

PONTETORTO TECNOSTRETCH is a combination of premium quality, stylish appearance, high elasticity and excellent thermal insulation. The fibres contain a spandex material that gives TECNOSTRETCH its required elasticity. The material is very pleasing to the touch thanks to the plush inner layer, which also retains a substantial amount of heat. The ideal combination of fibre density and weaving technique results in a lightweight, soft and at the same time very durable fabric that excels in its thermal properties in relation to its weight.

PONTETORTO TECNOSTRETCH je kombinací prémiové kvality, vzhledu, vysoké elasticity a tepelné izolace výborné úrovně. Vlákna obsahují materiál spandex, který dodává TECNOSTRETCH potřebnou pružnost. Materiál je velmi příjemný na dotek díky plyšové vnitřní vrstvě, která zároveň zadržuje velké množství tepla. Díky ideální kombinaci hustoty vláken a tkací techniky vzniká lehká, jemná a zároveň velmi odolná tkanina, která vyniká svými tepelnými vlastnostmi v poměru ke své hmotnosti.

SIBERIUM WATERPROOF with internal membrane makes shoes waterproof and breathable. The membrane guarantees a barrier with waterproof protection up to 10,000 mm. The moisture-regulating lining ensures to provide for the perfect microclimate for your feet during wear and outdoor activities, even in harsh weather conditions.

SIBERIUM WATERPROOF s vnitřní membránou dělá boty voděodolné a prodyšné. Membrána zaručuje bariéru s vodotěsnou ochranou až 10 000 mm. Vlhkost regulující podšívka zajišťuje dobré mikroklima pro vaše nohy při nošení a outdoorových aktivitách i v náročných povětrnostních podmínkách.

It is an innovative type of padding that is used to insulate and retain heat in clothing. This filling is made using a special technology of blowing synthetic fibers into the garment. Thanks to the air pockets within the filling, it has very good insulation properties and keeps the body warm even in adverse conditions. The great advantage is its lightness and softness, allowing easier movement and guaranteeing comfort even during various sports activities. Products with Emporium Loft filling are an excellent choice for those who prefer comfortable wear, unrestricted movement, and also require effective thermal protection.

Emporium loft - Je inovativní typ výplně, který je používán k izolaci a udržení tepla v oděvech. Tato výplň je vyrobena pomocí speciální technologie foukání syntetických vláken dovnitř oděvu. Díky vzduchovým kapsám uvnitř výplně má velmi dobré izolační vlastnosti a udržuje tělo v teple i v nepříznivých podmínkách. Velkou předností je její lehkost a měkkost, umožňuje snadnější pohyb a zaručuje pohodlí i při nejrůznějších sportovních aktivitách. Produkty s výplní Emporium loft jsou skvělou volbou pro ty, kteří upřednostňují komfortní nošení, neomezený pohyb a zároveň potřebují efektivní tepelnou ochranu.

Emporium agile - high-quality polyester material used as insulation in many of our products, especially jackets and pants. This insulation layer serves primarily for thermal protection, retaining body heat and effectively protects from the cold. The fibers of this textile filling tend to dry faster, wick sweat better and resist wet environments. In contrast to down insulation, it doesn't lose its insulating ability when in contact with moisture, it is hypoallergenic, and easier to maintain. Its reliable properties make it an ideal choice for our functional winter clothing.

Emporium agile - kvalitní polyesterový materiál používaný jako výplň do mnoha našich produktů, především do bund a kalhot. Tato izolační vrstva slouží především k tepelné ochraně, udržuje tělesné teplo a efektivně chrání před chladem. Vlákna této textilní výplně mají tendenci rychleji schnout, lépe odvádějí pot a odolávají vlhkým prostředím. Na rozdíl od péřových výplní, při kontaktu s vlhkostí neztrácí svou izolační schopnost, jsou hypoalergenní a snazší na údržbu. Svými spolehlivými vlastnostmi je ideální volbou pro naše funkční zimní oblečení.

COTTON CLIMA is a two-component material that combines natural cotton and synthetic polyester fibre. The upper part is made of the popular, pleasant to the touch cotton, which stands out for its softness, comfort and easy maintenance. The inner polyester fabric ensures the functional properties of the garment. One of the advantages of this technical material is its ability to wick moisture away from the body and quick drying. Along with durability, it creates ideal properties for clothing intended for sports, outdoor, or leisure activities.

COTTON CLIMA představuje dvousložkový materiál, který spojuje přírodní bavlnu a syntetické polyesterové vlákno. Svrchní část tvoří oblíbená, na dotek příjemná bavlna, která vyniká svou měkkostí, pohodlností a snadnou údržbou. Spodní polyesterová látka zajišťuje funkční vlastnosti oděvu. Jednou z výhod tohoto technického materiálu je jeho tendence odvádět vlhkost od těla a rychle schnout. Spolu s odolností tvoří ideální vlastnosti pro oděvy určené pro sportovní, outdoorové nebo volnočasové aktivity.

The TARANYX GRIP outsole for trail running is designed to provide maximum traction on natural surfaces. This innovative outsole is ideal for mixed terrain, allowing runners to confidently tackle any surface. The specially developed material blend not only enhances grip but also significantly reduces wear, ensuring long-lasting durability and reliable performance. TARANYX GRIP is synonymous with safety, performance, and resilience, offering runners confidence and stability with every step in challenging terrain.

Podrážka TARANYX GRIP pro trailový běh je navržena tak, aby poskytovala maximální trakci na přírodních površích. Tato inovativní podrážka je ideální pro smíšený terén, což běžcům umožňuje bez obav zdolávat jakýkoli povrch. Speciálně vyvinutá směs materiálů nejen zvyšuje přilnavost, ale také výrazně snižuje opotřebení, což zajišťuje dlouhou životnost a spolehlivý výkon. TARANYX GRIP je synonymem bezpečí, výkonnosti a odolnosti, a poskytuje běžcům jistotu a stabilitu při každém kroku v náročném terénu.

Fine True Leather is a premium technology utilizing high-quality full-grain leather, designed to meet rigorous testing standards. This material ensures maximum durability and protection in harsh environments. With its strength and natural texture, it offers long-lasting performance and reliability even in the toughest conditions."

Fine True Leather je prémiová technologie používající prvotřídní full-grain kůži, která splňuje nejvyšší testovací standardy. Tento materiál zajišťuje maximální odolnost a ochranu v náročných podmínkách. Díky své pevnosti a přirozené struktuře poskytuje dlouhou životnost a spolehlivý výkon i v těch nejnáročnějších prostředích.
